CURRENT CONTENT

(Technical Journals)

(A Monthly Current Awareness Service from Technical Journals)

Vol.4 No.07, July, 2020

The Central Library, IBM, Nagpur is subscribing the technical journals and also receiving them on complimentary basis on various subjects like Geology, Mining, Mineral Economics etc. These Technical Journals make up an important collection of latest scientific information. The library is rendering Reference Service to its users from these technical Journals (Article Indexing is one of them). Central Library, IBM provides Current Content Service from these technical journals in the name of "GEM" since 2006 on half yearly basis in print form. To expand this service to the IBM Offices all over India i.e. H.Q., Zonal & Regional Offices and to take a call of time, the Controller General, IBM desired to make this service online on monthly basis. The library staff made efforts to make it successful. This is the 7th issue of Volume-4 for this service named "तकनीकी पत्रिका विषय - सूची" (Current Content-A Monthly Current Awareness Service from Technical Journals) Vol.4 No.07, July 2020.

It will be highly appreciated if the valuable feedback is reciprocated. If some article as per content list is found to be of use by the reader the same may be requested and the library will send the scanned copy of the article to the interested reader.

CURRENT STATISTICS

POSTSCRIPT

LIGRA Designed as a tool to increase short-term revenue, the dispute resolution-cum-amnesty scheme will hamper the long-term objectives of tax policy and higher

compliance by delinquent taxpayers. page 15

Enabling Social Sustainability

Fiscal measures remain the biggest challenge for social sustainability in India: meagre public spending, loosely pursued regulation and impact measurement, limited access to finance, and weak CSR performance. page 42

Judiciary on Human Sacrifice

The Supreme Court's decision in a human sacrifice case highlights the legal system's struggle with making sense of crimes motivated by superstitions and cultural beliefs. page 12

Impact of Fiscal Populism

The impact of the onset of elections and government fragmentation on fiscal deficit between 1978–79 and 2016–17, a time period with simultaneous transitions in the economic and political landscapes in India page 34

Intuitive Economics

The case of the contrasting history of hybrid vs "desi" breeds demonstrates how the innate-intuitive economic model helps ascertain when to use difference or division in cost-benefit analysis. page 28

Economic & Political Weekly, Vol. 55 No. 08, February 22, 2020

Questioning Citizenship-based Taxation in Budget 2020

The proposal in the Finance Bill, 2020 to introduce taxation on the basis of citizenship for those non-resident Indians who do not pay tax in their countries of residence has proven to be controversial.

— Alok Prasanna Kumar

Human Sacrifice, Sentencing and the Death Penalty

12 The Supreme Court's judgment in Ishwari Lal Yadav v State of Chhattisgarh deviates from the principle of individualised sentencing and ignores evidence on the complex anthropological and psychological dimensions of human sacrifice. — Anup Surendranath, Neetika Vishwanath & Preeti Pratishruti Dash

Sabka Vishwas Scheme: Settlement at the Cost of Equity

Sabka Vishwas Scheme is a dispute resolution-cum-amnesty scheme, with an objective of generating revenue in the short term, that will reduce the taxable capacity of the state and motivation towards compliance in the long run.

— Errol D'Souza, Astha Agarwalla

India's 'Three Pest Campaign'

Over the last few years, the central government has declared certain species of wild animals as "vermin" in some states in an arbitrary manner without any scientific assessments, thus allowing uncontrolled hunting of these animals. — Ritwick Dutta

Intuitive Economics and the Outcome of an Operation

The contrasting history of hybrid versus "desi" breeds in agriculture as opposed to animal husbandry illustrates how common people intuitively know when to use difference and when to use division in cost–benefit analysis. — Milind Watve, Ojas S V

Persistent Fiscal Deficits and Political Economy Transitions

34 The impact of macroeconomic and political economy factors on India's fiscal deficit between 1978–79 and 2016–17—a period when the country witnessed simultaneous economic and political structural transformations—has been investigated in this study. — Amarendu Nandy, Abhisek Sur & Santanu Kundu

Investments for Social Sustainability in India

42 The current status of social development perspective and the role of government, corporate and social enterprises in delivering social sustainability in India are examined. — Shubham Kumar, Tapas Kumar Giri

Who Is Afraid of Pakistan's Aurat March?

49 The Aurat March of 2019 in Pakistan faced severe backlash from both conservative as well as like-minded quarters, on account of some hard-hitting slogans and jabs raised against prevalent masculinist social norms. — Afiya Shehrbano Zia

Postscript

60 Abhishek Kumar on the relationships between things and ourselves that we see in photographs; Kavya Srinivasan on the many different forms that dissent can take; Harini Rajagopalan on how feminist art rejects the male gaze; and Last Lines by Ponnappa.

CURRENT STATISTICS

POSTSCRIPT

Transformation in Manufacturing

An examination of the periods and industries in the recent past that have seen a relatively better performance of the organised manufacturing sector page 35

Corporate Tax Reductions

The latest corporate tax policy, which is based on misplaced priorities, needs to be corrected in order to contain the already rising inequality in the system and prevent a few companies from benefiting. page 62

Dual Burden on Children

An analysis of wealth inequalities in child nutrition shows that children from the poorest households in the backward states suffer from the burden of the state effect and the class effect. page 45

A Flawed Weave

Maharashtra has the largest number of power looms in the country, but its industry has been subjected to challenges from successive policies. page 17

To Remember or to Forget?

A resident of violence-hit Delhi finds that for the privileged, life can go on easily in the face of what feels like the end of the world. page 71

Economic & Political Weekly, Vol. 55 No. 10, March 07, 2020

Abolition of the Death Penalty: A Tough Road ahead for India

The retributive nature of our criminal justice system that attaches a lot of importance to punishment is looked at through a critical lens.
— Anup Surendranath

Sounding the Battle Cry: Supreme Court on Women in the Army

12 The Supreme Court's judgment of 17 February 2020, granting women permanent commission in the army, has opened the doors for women to seek benefits and status associated with seniority of rank. However, the idea of women in the armed forces requires deeper engagement. — Smriti Singh

Davinder Singh's Arrest: A Tale of Opacity and Impunity

14 Considering the Jammu and Kashmir police officer Davinder Singh's alleged links to the Parliament attack and Pulwama case, transparency in this regard is necessary to ensure that questions of national security do not escape democratic accountability. — Vappala Balachandran

Power Looms in Maharashtra: Old and New Crises

17 The current crisis of the power loom sector in Maharashtra, the state which has the largest number of power looms in the country, is examined. — Supriya RoyChowdhury

Digital Divide and the Aakash Tablet

27 The effectiveness of the Aakash tablet project, positioned by the Indian government as a device to "bridge the digital divide," is examined by surveying different categories of users. — Ashu Bapna, Kunal Garg & Anurag Mehra

Long-run Performance of the Organised Manufacturing Sector

35 The Indian manufacturing sector has not increased its share in output or employment along expected lines. The aggregate trends in this sector at the 3-digit level of the National Industrial Classification from 1983 to 2017 are investigated here. — Amit Basole, Amay Narayan

Changing Wealth Inequalities in Child Nutrition in Indian States

45 How have wealth inequalities in child nutrition changed in the major states of India between the last two rounds of the National Family Health Survey? The temporal change in the likelihood of child stunting in the poorest quintile of households vis-à-vis the richer quintiles is examined.
— Simantini Mukhopadhyay, Achin Chakraborty

Industrial Disputes in the Indian Textile Industry

53 An econometric analysis has been done to identify the causes of occurrences of disputes, strikes, and lockouts in the Indian textile industry. — Meenu Saihjpal

Corporate Tax Reductions: Weak Analytical Foundation

62 The claim of sharp reduction in effective corporate tax rate does not, in fact, represent any significant reduction in the tax burden that the companies bear at present. — J Dennis Rajakumar, S L Shetty

Postscript

69 Sujit Kumar Mishra on the competitive market of beach towns like Puri that force low-skilled vendors to continue in low-gain occupations; Kaveri Mayra on how patriarchal and societal conditioning has prioritised medicine over nursing and midwifery; Swati Daftuar on the privilege that allows some lives to go on unaffected, while some others, elsewhere in the same city, are in peril; and Last Lines by Ponnappa.

Minerals & Metals Review, Vol. 46 No. 3, March 2020

Market Report

Copper

Coronavirus and its impact on the copper

The red metal copper 2020 demand looks promising

Copper is set to drive the electric vehicle revolution

Copper, the industrial metal and its myriad of end-uses

Wire

Wire and cable manufacturers take retail route to ramp up sales

Demand for steel pipes to log CAGR of 7-8%

In Conversation

"wire and Tube regard themselves as

'Government needs to review all existing FTAs'

Metal In Focus

Coronavirus - impact on zinc and lead

Recycling

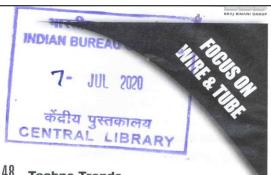

Hong Kong Convention: India step forward in green ship recycling

Electric Vechile Update

India on its way for an electric future

Case Study

Grundfos CR pumps for state-of-the-art mining equipment

Techno Trends

Reprocessing the first production step: Integration of shredding machines into foundry plants

Automation

Advanced automation for unmanned operation of stockyards, port terminals

Technology Update

Thermax displays its edge in technology at 'Boiler India 2020'

Company Profile

Leoni increasingly focused on e-mobility

56 **Renewable Energy**

Economic slowdown affecting solar installations in India

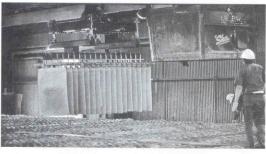

Events

Technological extravaganza galore at Auto Expo 2020 Components

'Technological Innovations'- the theme of ICDC Copper Conference 2020

wire & Tube China 2020 event on schedule as China strives to ensure safety of participants

62 **Statistics**

Minerals & Metals Review - March 2020 4
