CURRENT CONTENT

(Technical Journals)

(A Monthly Current Awareness Service from technical journals)

Vol.1, No.3-September 2017

The Central Library, IBM, Nagpur is subscribing the technical journals and also receiving them on complimentary basis on various subjects like Geology, Mining, Mineral Economics etc. These Technical Journals make up an important collection of latest scientific information. The library is rendering Reference Service to its users from these technical Journals. Central Library, IBM provides Current Content Service from these technical journals in the name of "GEM" since 2006 on half yearly basis in print form. To expand this service to the IBM Offices all over India i.e. H.Q., Zonal & Regional Offices and to take a call of time, the Controller General, IBM desired to make this service online on monthly basis. The library staff made efforts to make it successful. This is the 3rd issue of this service named **"Current Content- a monthly current awareness service from technical journals", Vol.1, No.3, September 2017.** The online journal "World Metal Statistics" is available for reference in central library upto October 2017.

It will be highly appreciated if the valuable feedback is reciprocated.

Mrs.D.H.Vairagare

Assistant Library & Information Officer

FEATURES

Shell-supported Ball Mills: Grinding Technology on a Large Scale
A major ball mill manufacturer presents a persuasive case for choosing this proven — and improved — design over other types..... 32

Up in the Air
At any mine site with crane-assisted construction or overhead repairs under way, what goes up must come down — at the right time and under complete control. Here's how the latest crane tech can help ensure that outcome..... 34

Sourcing Finances After the Super Cycle
A credit crunch and a mining bear market have created a new generation of investors — realists — making funding challenging for some..... 38

OCP Bets Big on Rising Phosphate Demand
The Moroccan phosphate producer and world's leading phosphate rock exporter is investing in new technology to boost its market share and cut its energy bills..... 44

Jenmar Develops Rock Bolting Solutions
Solving the pumpable resin riddle, a new automated resin system should improve safety for hard-rock miners working in difficult geology..... 50

A New Approach to Truck-shovel Mining
Employing a Surge Feeder working in tandem with a Mobile Sizing Station, open-pit miners could soon realize the continuous mining benefits of in-pit crushing, while using the existing truck fleet for haulage..... 54

Special Report: Mining in British Columbia and Yukon and a Look at Vancouver: North America's Exploration Hub..... 57

LEADING DEVELOPMENTS

South Africa's Mining Industry Opposes New Mining Charter..... 4
Agrium and PCS Become Nutrien..... 5
Iamgold-Sumitomo JV Will Develop Ontario Gold Project..... 5
Gold Reserve Receives First Payment From Venezuela..... 6
Nornickel Completes 30% Expansion of Talnakh Nickel-Copper Concentrator..... 6
Asanko Planning Major Expansions at Ghana Gold Operations..... 6

AROUND THE WORLD

U.S. & Canada: Stillwater Reaches 2-year Wage Agreement With US Steel Workers..... 8
Latin America: Construction Well Under Way at Fruta del Norte in Ecuador..... 14
Australia/Oceania: Rio Tinto Studying Koodaideri Iron Ore Development..... 18
Africa: Acadia, Tanzania Discussing Export Dispute..... 20
Asia: Amulsar Gold Project Moves Ahead..... 22
Exploration Roundup: Marathon Gold Plans 60,000-m Drill Program at Valentine Lake..... 24

Now in the ninth year of its expansion program, OCP plans to have doubled its phosphate production capacity by 2025 to 57.4 million mt/y, of which 39 million mt/y will be at its Khouribga operations. Finely ground phosphate concentrate slurry is delivered by pipeline to a facility at Jorf Lasfar (cover photo), before being stored and distributed to the various units at the chemicals complex.

In This Issue

Working on or near water at active, closed or abandoned mine sites is inherently dangerous. Unmanned aerial vehicles show great potential to improve safety associated with sampling by eliminating the need for personnel to access the pit lake water surface. These drones are likely to replace human water samplers in the near future at considerable cost savings, page 20. The value of industrial minerals production in the United States reached \$51.6 billion last year, according to the U.S. Geological Survey, a 6-percent increase from 2015. ME's look at industrial minerals activity in 2016 begins on page 29. Cover photo courtesy of Goldcorp Canada.
