Disclaimer

This bulletin is a precise compilation of All India Mining Lease Directory as on 31.3.2025 (P) which is a provisional database. The tabular data is reproduced with due care as a general information. The Mining Lease Directory is based on the data supplied by State Governments under the statutory Rule 59(2) of Minerals (Other than Atomic, Hydrocarbons Energy Minerals) Concession Rules, 2016 and the data received from Regional Offices of IBM. The sources of information are considered reliable. However, no guarantee is expressed or implied regarding accuracy, adequacy, completeness, legality, usefulness of the information. IBM shall not be responsible for any tort or liability arising out of or in connection with the use of data. The disclaimer applies to use of information in isolated or aggregate terms. The data is provided on "as is" basis and assumes no responsibility for errors or omissions. IBM reserves the right to make additions, deletions or modifications to the content/information any time without prior notice as the validation of data is a continuous process. PREFACE

Indian Bureau of Mines (IBM) is mandated to ensure scientific and sustainable mining of major minerals in the country. It also maintains a database on Mineral & Mines Sector. IBM undertakes compilation and perpetuation of Directory of Mining Leases in India which comprises detailed information on Mining Leases granted/executed. The Bulletin of Mining Leases, Composite Licences, Exploration Licence and Auction are published based on this Directory.

Bulletin of Mining Leases, Composite Licences, Exploration Licence and Auction -2025 (Excluding Atomic Minerals, Hydrocarbon Energy Minerals, Baryte, Felspar, Mica ,Quartz and Minor Minerals) is the 28th edition under the series. It contains information on Mining Leases (ML), Composite Licences (PL cum ML), Exploration Licences and Auction (Excluding Atomic Minerals, Hydrocarbon Energy Minerals and Minor Minerals) as on 31.3.2025(P). This Bulletin does not cover information related to minerals delisted from minor minerals vide Notification of Ministry of Mines vide S.O. 924 (E) dated 20.02.2025— namely Baryte, Felspar, Mica and Quartz.

The information sourced from the Directory of Mining Leases after assortment and analysis is segregated into State-wise, District- wise, Mineral-wise and Sector-wise categories and integrated into the text for easy comprehension. Further, the data on distribution of Mining Leases executed across the country have been demarcated and classified into high, medium and low mineral-potential-bearing districts to facilitate easy assimilation. This type of information will not only satisfy the basic need of various entrepreneurs dealing with mineral industry, but also help the planers to consider 'district' as a unit in the process of planning and development of an area of a districts.

This publication is based on the Directory of Mining Leases as on 31.3.2025 (P), which in turn is compiled from the data supplied by State Governments under the statutory Rule 59(2) of Minerals (Other than Atomic and Hydrocarbons Energy Minerals) Concessions Rules, 2016 and the data received from Regional Offices of IBM. IBM is thankful to all State Government Departments for furnishing information on mining leases, prospecting licences, composite licences (prospecting licence-cum-mining lease), Exploration Licence and Auction. It is my belief that this publication would prove to be useful and handy to stakeholders in the Mines and Mineral Sector looking for information on mineral concession, in compiled form.

It is hoped that the analysis and information presented in this publication will be useful in the process of planning and programming of new ventures in judicious utilization of mineral resources and project of mineral based industries in the country.

Nagpur dated
30.09.2026

(Pankaj Kulshrestha)

Controller General
Indian Bureau of Mines

INTRODUCTION

Chapter 1

India is endowed with a wide variety of naturally occurring minerals. The country has a total geographical area of 328.74 million hectares. Of this, the mining lease area, except for fuel, atomic minerals and all minor minerals, constitutes around 0.087% (287015 hectares). The position of mining leases as on 31.3.2025(P) reveals that there are as many as 2680 mining leases of minerals (Excluding Atomic Minerals, Hydrocarbon Energy Minerals, Baryte, Felspar, Mica, Quartz and Minor Minerals) granted in the country by the State Governments covering 35 minerals with a total lease area of about 287015.79 hectares and that which are spread over 23 States/UTs. These 35 minerals are broadly classified into metallic and non-metallic minerals. These are being exploited to cater to the needs of domestic mineral-based industries as well as to meet export demands to earn foreign exchange. This Bulletin highlights state-wise, sector-wise and district-wise distribution of mining leases, frequency distribution of mining leases, prospecting licences, composite licences (prospecting licence-cum-mining lease) etc. Though apparently negligible, the mining lease area of the country is considered as an important land use segment as it contributes to the economic growth of the country. Besides, it calls for environmental protection, as land under leases is subjected to degradation during the process of mining activities.

Under Rule 59 (1) of Minerals (other than Atomic and Hydrocarbons Energy Minerals) Concession Rules, 2016, a copy of every mineral concession granted or renewed under the Act and the rules made thereunder shall be supplied by each State Government within two months of such grant or renewal to the Controller General, Indian Bureau of Mines. Besides, under Rule 59 (2) of the said Rule, a consolidated annual return of all mineral concessions granted or renewed under the Act and rules made thereunder shall be supplied by each State Government to the Controller General, Indian Bureau of Mines, in such form as may be specified by him (mineral concessions granted or executed in Proforma 'A'; mineral concessions renewed in Proforma 'B' and mineral concessions terminated/lapsed/closed in Proforma 'C' for the preceding financial year ending in March), not later than the 30th day of June following the year to which the return relates.

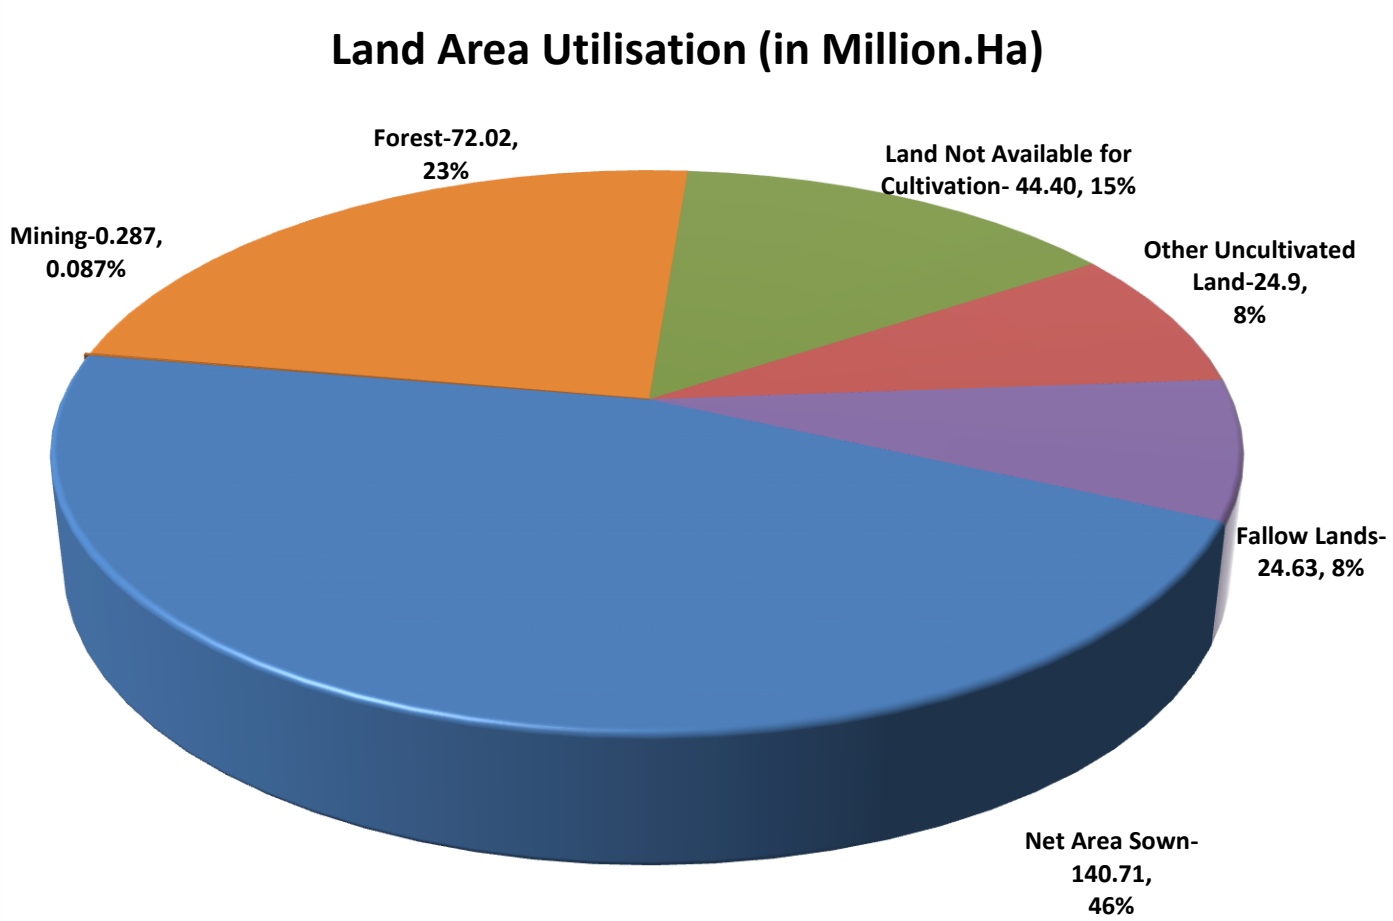

The information pertaining to mineral concessions as received is then compiled, processed and updated. These stored data can be retrieved and made available for analysis & further requisite studies and for the information seekers.

LAND USE SCENARIO

Chapter 2

India's geographical area is about 328.74 million hectares. The entire geographical area is broadly classified into 7 segments which are shown in the following pie chart:

Source: *Agricultural Statistic At a Glance, 2024, Directorate of Economics & Statistics, Department of Agriculture & FarmersWelfare, Ministry of Agriculture & Farmers Welfare.*

****:*** *ML Directory as on 31.03.2025(P) for minerals (Excluding atomic minerals, hydrocarbon energy minerals, Baryte, Felspar, Mica ,Quartz and minor minerals) prepared by IBM, based on data received from State Govts./UTs /regional Offices of IBM.*

The mining lease area constitutes around 287015.79 Hectares which is approximately 0.087 % of the total geographical area. However, mining lease area, though a minuscule segment in the total land area, continues to be an important segment and an essential contributing factor to the economy of the country. At the same time, there is an imperative need to pay due attention to environment aspects as these land areas under mining leases are subjected to various processes of mining activity and are liable to degradation.

MINING LEASES

Chapter 3

3.1 STATE-WISE ANALYSIS

As per the Lease Directory as on 31.3.2025 (Provisional), there were 2,680 mining leases granted by State Governments for 35 different minerals, covering an area of 287015.79 Hectares in the country. States rich in minerals where maximum number of mining leases were granted are Madhya Pradesh (17.16%) followed by Tamil Nadu (15.60%), Andhra Pradesh (14.03%) & Gujarat (12.01%), Karnataka (8.47%), Odisha (6.90%), Rajasthan and Chattisgarh (4.59% each), Maharashtra (4.66%), Jharkhand (3.69 %) and Telangana (2.80 %). These eleven States together account for about 94.50% of the total no. of leases executed and the remaining twelve States where such leases were executed accounted for about 5.50 % of the total no. of mining leases.

The maximum area in percentage covered under mining leases in different States are Odisha (18.04%) followed by Madhya Pradesh (14.14%), Rajasthan (12.84%), Andhra Pradesh (9.07%), Chhattisgarh (8.75%), Gujarat (8.60%), Karnataka (8.32%), Jharkhand (6.29 %), Maharashtra (4.32%), Telangana (3.26%) and Tamil Nadu (3.05%). These eleven States account for about 96.66 % of the total mining lease area granted and the remaining 3.34 percent was accounted for by the rest of the twelve States.

The State-wise mining lease distribution together with lease areas as well as state-wise /mineral-wise/ district-wise distribution of mining leases as on 31.03.2025 (P) are furnished in Tables - 1 to 3.

Table – 1: State-wise Summary of Mining Lease Distribution

(Excluding Atomic Minerals, Hydrocarbon Energy Minerals, Baryte, Felspar, Mica, Quartz and Minor Minerals)

3.2 DISTRICT-WISE ANALYSIS

(i) High Mineral Potential Districts

District-wise analysis indicates that the total number of mineral-bearing districts is around 211 and that they are spread across 23 States/UT's in the country.

Out of these, 4 districts in 3 States are considered as high mineral potential districts wherein there are more than 100 mining leases in districts. A total of 485 mining leases are in these districts covering an area of about 32459.38 hectares. These constitute about 18.10% of the total number of mining leases in the country and cover around 11.30% of the total area.

(ii) Medium Mineral Potential Districts

Districts, wherein number of mining leases is between 51 and 100 are considered as Medium Potential districts. There are 547 such mining leases in 08 districts in 5 States covering an area of about 58050.82 hectares. These constitute 18.83% of the total number of mining leases in the country and cover over 20.22% of the total area.

(iii) Low Mineral Potential Districts

Districts wherein number of mining leases is between 1 and 50 are considered as Low Mineral Potential districts. There are 1,648 mining leases in 201 districts in 23 States/UT's covering an area of about 196450.85 hectares in the country. These account for 61.50% of the total number of mining leases in the country covering 68.45% of the total area.

Information on State-wise the number of mining leases in high mineral potential, medium potential, low potential districts is furnished in **Tables-4 to 6.**

Table - 4: High Mineral Potential Districts (P)

3.3 FREQUENCY DISTRIBUTION OF MINING LEASES (P)

The number of mining leases so far executed for various minerals are classified into seven categories:

Category – I :	Includes minerals for which number of mining leases executed are more than 1000;
Category – II :	Includes minerals for which number of mining leases executed are between 501 and 1,000;
Category – III :	Includes minerals for which number of mining leases executed are between 301 and 500;
Category – IV :	Includes minerals for which number of mining leases executed are between 201 and 300;
Category – V :	Includes minerals for which number of mining leases executed are between 101 and 200;
Category – VI :	Includes minerals for which number of mining leases executed are between 51 and 100;
Category – VII :	Includes minerals for which number of mining leases executed is between 1 and 50.

Chapter 4

Prospecting Licences or Composite Licences

Under the Mines & Minerals (Development & Regulation) Act, 1957, "Prospecting Licence" (PL) means a licence granted for the purpose of undertaking "prospecting operations". Prospecting operations mean any operation undertaken for the purpose of exploring, locating or proving mineral deposits. The State Governments and Union Territories are empowered to grant/execute/renew/revoke prospecting licences (PL) and composite licence (A prospecting licence- cum-mining lease as defined in the Act, i.e., having two stage concession granted for purpose of undertaking prospecting operations followed by mining operations) under provisions of Minerals (other than Atomic and Hydrocarbons Energy Minerals) Concession Rules, 2016. As per Section 6(1)(a) of Mines and Minerals (Development and Regulation) Amendment Act, 2015, no person shall acquire in respect of any mineral or prescribed group of associated minerals [in a State] – one or more prospecting licences covering a total area of more than twenty-five square kilometers.

4.1 STATE-WISE DISTRIBUTION OF PROSPECTING LICENCE OR COMPOSITE LICENCES (PROSPECTING LICENCE-CUM-MINING LEASE)

"Composite Licences or prospecting licence-cum-mining lease" means a two stage concession granted for the purpose of undertaking prospecting operations followed by mining operation".

As per information available, details of number of "Composite License" (Excluding atomic minerals, hydrocarbon energy minerals and minor minerals) granted during the year 2022-23 to 2024-25 have been furnished in the Table No. 10 & 11**.**

4.2 MINERAL-WISE DISTRIBUTION OF PROSPECTING LICENCES

Mineral-wise distribution of prospecting licences or composite licences granted for minerals (Excluding atomic minerals, hydrocarbon energy minerals and minor minerals) for the year 2022-23 to 2024-25 is furnished in Table-11**.**

Auction Regime

Chapter 5

Since the introduction of the competitive auction regime in 2015 through the MMDR Act, India has tendered 684 mineral blocks up to Mar-26. India's mineral sector has achieved a significant milestone in the financial year 2025–26 with the successful auction of 212 mineral blocks, the highest ever in a single year.
